

great things happen in a chair

## USER GUIDE: 13C single position knee tilt control with seat slider

**1 seat height adjustment** - Adjust the seat height by lifting your weight out of the chair and pulling up on the paddle. Proper seat height is realized when the top of your legs are somewhat parallel to the floor.

**2 back lock adjustment (single position)** - Use the same paddle as you use for the seat height adjustment. To lock the chair in an upright position, shift your weight forward until the chair is in an upright position, then push lever in. To rock (free float) shift your weight forward and pull the lever out.

**3 back/recline tension adjustment** - Rotate knob clockwise to increase tilt tension. Rotate knob counter clockwise to decrease tilt tension.

**4 seat slider** - Pull up on paddle while shifting your weight forward to move your seat forward or backward to move your seat back.
